PEAKE
CONSTRUCTION CONSULTANTS

WHO WE ARE

Peake Construction Consultants is a commercial infrastructure consultancy that provides contracts and claims management to large construction and infrastructure projects worldwide. We work across the project lifecycle from award to closeout and alternative dispute resolution, acting for both governments and contractors.

WHAT WE DO

We know the unique challenges that large projects present and how busy project teams are.

We believe that the best time to identify and solve issues is before they become a problem. So we work closely with the project team, across project managers, engineers, CAs, in-house legal, planners and cost estimators, to provide quick, practical and cost effective advice and work that helps the project team when they need it.

Our goal is to ensure that our clients have all the information they need to make informed decisions on program, risk, cost, contractual, claim and dispute issues, at the time they arise.

Peake provides cost effective advice and project services to ensure that your project is ahead of the curve and can close projects on time and budget, while maintaining relationships.

COMPANY OBJECTIVES

HIGH PERFORMANCE VALUE

Minimal overheads, so that our value is directed in the quality work we deliver.

PRACTICAL SOLUTIONS

We are result oriented, focusing on the end in mind with practical solutions to get there.

RESOLUTION DRIVEN

No matter what stage of the project, we focus on the vision of resolution every step of the way.

CLAIMS MANAGEMENT

Honest analysis and recommendations, strategic advice and the preparation of detailed, clear and accurate time and cost claims and correspondence, that is contractually and commercially effective.

CONTRACT MANAGEMENT

Independent, pro-active and disciplined contract management to ensure that your contractual entitlements are maintained and maximized, and that there are no surprises for contractors or clients.

RISK MANAGEMENT

We know that risk management isn't something that is only done at the start of a project, but that it needs to be managed throughout the project lifecycle. We consider that with proactive, early engagement, potential risks and scope gaps can be unique opportunities for clients and contractors.

DIRECTOR PROFILE

CON MEYS, Director

Con is a New Zealand lawyer with over fifteen years of experience in contract management and construction dispute resolution in Oceania, Asia, the UK and the Middle East.

He specializes in claims resolution and works well with multiple departments and stakeholders on major infrastructure projects, including rail, aviation, logistics and medical projects.

Con has extensive experience in mediation, adjudication, litigation and arbitration proceedings, as well as the preparation and execution of commercial strategies to manage claims resolution and avoid conflict upon major construction and engineering projects.
